## PROFILE

---

Frontend Developer with over four years of production experience in React, React Native and Next.js. At Ambit.la I build across a full restaurant-management SaaS ecosystem — cloud point of sale, reporting, e-commerce, and a fleet-management mobile application with more than 50,000 downloads on Google Play. I work in TypeScript with automated test coverage, and care about interfaces that stay maintainable long after they ship.

## EXPERIENCE

---

### Frontend Developer

*Oct 2022 – Present*

*Ambit.la (formerly Directo Group) — Monterrey, Mexico*

Ambit One is a cloud restaurant-management suite — point of sale, inventory, kitchen display and e-invoicing — used across Latin America, integrated with Rappi, Uber Eats and DiDi Food, and currently expanding into Argentina and Peru.

- Develop and maintain the frontend across the full product ecosystem: the cloud point-of-sale system, the e-commerce storefront, and reporting interfaces that surface sales and operational data to restaurant operators.
- Build Ambit Driver in React Native, a delivery-fleet application with more than 50,000 downloads on Google Play, supporting live order assignment, real-time delivery tracking and multi-branch administration.
- Improve organic search visibility of the public product site through semantic HTML structure and meta tag optimisation.
- Work in TypeScript with Jest and Vitest coverage, applying SOLID principles to keep component architecture scalable and maintainable.

### Frontend Specialisation

*2021 – 2022*

*Self-directed*

- Advanced React bootcamp and a self-built portfolio of applications — custom hooks, API-driven SPAs and Next.js projects — while moving from desktop and backend development into frontend engineering.

### Programmer

*Jan 2021 – Apr 2021*

*Hancarsoft — Sonora, Mexico*

- Developed nomenclature-management software: application logic and user interfaces in C#, with database design and administration in SQL Server.

## EDUCATION

---

### B.Eng. in Software Engineering

*Aug 2017 – Jun 2021*

*Universidad Estatal de Sonora — Degree completed; professional certification obtained.*

## TECHNICAL SKILLS

---

**Core** TypeScript, JavaScript (ES6+), HTML5, CSS3, C#

**Frameworks** React, React Native, Next.js, Node.js

**Testing & tools** Jest, Vitest, Git, GitHub, SQL Server

**Practices** Responsive design, user interface design, SOLID principles, SEO fundamentals

**Languages** Spanish (native), English (B2 — professional working proficiency)
